

Do you worry that your drinking water may not be safe? Does it matter to you that our aquifer remains pristine and does not become contaminated by injecting PureWater Soquel treated sewer water?

32

Are you worried about the chemicals and drugs this Project cannot eliminate, yet the Board ignores the problem?

18

Why isn't the recycled water going to be used to irrigate parks, public landscaping and golf courses instead of using valuable potable water?

23

Why did the district buy 200 acres of watershed land to build a stormwater capture reservoir but refuses to build it?

21

Why are nearly half of the District's wells not in production?

11

Our bills keep skyrocketing no matter how much we conserve. These high rates were calculated to bail out the ridiculously expensive, energy-hogging PureWater Soquel Project that may not be financially-sound.

30

Is money no object? Does it make sense to spend millions on consultants, while paying staff monthly bonuses of \$1000 and more?

22

The Board does not want to hear from us water users, and has reduced the public comment time at meetings.

20

They've forgotten that they work for us!
I will change that. I will work to restore transparency, honesty, common sense and safety.

22
